

YOUR HOME KEEPS WATCH

ENJOY YOUR SMART HOME

Your home is always looking out for you. Whilst you're asleep, it keeps watch, alerts you to any intruders and sounds the alarm in an emergency. It can warn you about dangers such as fire or water leaks and light a path to safety. Your Smart Home gives you peace of mind, around the clock.

FULL ALARM FUNCTIONALITY

You don't need any additional, expensive alarm equipment as part of a Smart Home. Existing components in your home can be combined to create a fully integrated alarm system which reliably alerts you to any danger.

FIRE & FLOOD PROTECTION

If smoke or fire is detected, your home will immediately alert you with flashing lights and a phone call. Emergency lighting can guide residents to safety and blinds open to alert passersby and give easier access for emergency services. Should a water leak be detected, your home will bring this to your attention so that you can act quickly to minimise any damage.

PRESENCE SIMULATION

If you're on holiday, you can rest assured that your home will behave as if you were home, at least it will seem so from the outside. Your home will mimic your presence by activating the blinds and lighting according to your usual routine.

ALARMS AND NOTIFICATIONS

As you leave the house, your Smart Home switches to 'Awa Mode'; in the event of an alarm, whether that's in the form of a break-in, a fire or a water leak, you'll be the first to know via an email, phone call or push notification.

DID YOU KNOW?

A burglary takes place every 40 seconds in the UK, with London remaining the 'burglary capital' of the UK. Preferred break-in points are unsecured door and windows on the ground floor. By installing an intelligent security system, you can enjoy peace of mind that you can check in on your home at any time, and be alerted at the first sign of trouble.

5 SIMPLE STEPS TO YOUR SMART HOME

1 PLANNING

Your partner will be on hand to help you plan and design your project. They'll be able to advise you and help you decide which features and functions you'd like in your new home.

2 WIRING

Your partner will oversee the wiring for your smart home, ensuring that your home uses future-proof cabling and that everything is wired correctly. If your project uses Air products, your partner can oversee the correct installation of these.

3 CONFIGURATION

After successfully installing your products, your partner will configure the system. We recommend all smart home are configured according to the standard.

4 RAY TO GO

At this point, you'll be able to start enjoying your new smart home and all the benefits of Autopilot Living.

5 OPTIMISATION AND EXPANSION

Once you've settled in, get in touch with your partner, who'll be able to assist you with further personalisation and expansion of your smart home.

THE 360° SMART HOME

Offers a one-stop shop for products, software and knowledge. High quality, European - made products, powerful software and the right know-how... it's all part of what we offer, which means you'll be able to enjoy a home that's reliable, future-proof and 100% compatible.

SMART HOMES WORLDWIDE

Over 50,000 Loxone Smart Homes are improving the lives of people all over the world. With this experience, Loxone has become one of the leading smart home brands worldwide.

In more than 90 countries, from modest family homes to palatial villas, the Miniserver has already transformed the way people live in their homes. Each of them have a unique story to tell. Enjoy just a glimpse of what your life in a Smart Home.

INTELLIGENT ENERGY MANAGEMENT

WORKING IN HARMONY

In your home, the heat of the sun can be captured to bring the rooms to a comfortable temperature. Whether you have a fireplace, large windows, or use solar heat pumps, your rooms will be intelligently heated to reach the desired temperature whilst ensuring energy is not wasted.

STANDBY KILLER

Your smart home automatically takes all of your standby devices and other power guzzlers off the grid when they are not needed to help you save on your energy bills.

PRODUCE YOUR OWN ENERGY AND OPTIMISE HOW YOU USE IT

The self-produced energy in your home will be efficiently used whenever it is available. This allows you to do a load of washing, run the dryer or use the dishwasher without it costing you anything.

DISCOVER ENERGY SAVING POTENTIAL

A Loxone Smart Home can intelligently monitor your home's electricity consumption as well as your electricity production. You can view these statistics directly from your smartphone at any time.

ENJOY FREE CAR CHARGING

If you have a solar PV system and an electric car charging system, your Smart Home could help you charge your electric car for free. It intelligently balances the electricity demand within the home, and channels any excess electricity to your car charger.
